

Responsibly Armed Citizen Criterion

Every year, Apache Solutions LLC delivers over 1,000 hours of private, one-on-one firearms training to students from all walks of life—beginners, seasoned carriers, parents, professionals, and first-time gun owners. Apache has become a true “Talent Hot Spot” (as described in *The Talent Code* by Daniel Coyle)—a rare environment where deep practice, expert coaching, and ignition combine to produce extraordinary skill. With over 1,000 hours of private 1-on-1 sessions taught annually, our Responsibly Armed Citizen Criterion (RACC) mirrors the small, intense training hubs Coyle studied—like the Spartanburg tennis academy or Brazilian soccer fields—that churn out disproportionate numbers of masters.

Elite performers such as Tiger Woods, Serena Williams, and even Leonardo da Vinci prove the model: private, focused repetition under a dedicated coach accelerates mastery up to 90% faster than group settings. This is our Responsibly Armed Citizen Criterion (RACC)—your personal hot spot for concealed carry performance, where every session is carefully planned, personalized, and designed to build real proficiency through the same proven formula.

How RACC Works:

You book flexible 1–2 hour private sessions any day of the week—mornings before work, evenings after kids’ practice, or weekends—whatever fits *your* life. A dedicated professional trainer works exclusively with you, starting with a goal-setting conversation: “*What do you want to achieve—safe home defense, confident carry, or stress-free range days?*” From there, RACC unfolds in four clear phases:

1. **Phase 1: Safety, Gear, Etiquette, Procedures, Marksmanship** Master the 4 universal safety rules, range commands, gear fit, and precision shooting. You’ll pass the Apache Level 1 B-8 live-fire test, demonstrate safe loading/unloading, field maintenance, tourniquet application, and holster familiarization (transport & carry)—all pressure-tested under real range conditions.
2. **Phase 2: Refined Marksmanship Performance and General Manipulations** Build speed and control with the Apache Level 2 B-8, malfunction clearing, holster draw from concealment, our 2nd Level of Control, recoil management, and reactive reloads—proven under timed scrutiny.
3. **Phase 3: Control, Efficiency, and Complex Manipulations** Master precision under pressure with Apache Pistol Metrics, proactive/retention reloads, and our 2nd Level of Control—every rep verified.
4. **Phase 4: Refined Control and Competency** Earn final mastery with our Rite of passage, FBI Handgun Qualification, complex malfunctions, and single/support-hand shooting—your full readiness confirmed.

Each phase ends with **objective benchmarks**—(one written exam in phase one), live-fire scores, and skill demonstrations—just like earning a new belt in martial arts. You **only advance when you’re truly ready**, never rushed or left behind.

Why RACC Stands Alone:

- **Private, not crowded classes** — No waiting behind 20 people. Every minute is *yours*.

- **Schedule on *your* terms** — No rigid 8-hour weekends. Train 1–2 hours at a time, as often as you want.
 - **Pressure-tested, not just practiced** — We don't just teach; we **verify** you can perform when it counts.
 - **Redundancy beats complacency** — Every safety habit is drilled until it's automatic.
 - **No one-size-fits-all** — Your goals, your pace, your success.

RACC FAQs – Quick Answers to Get You Started

1. What is RACC?

The Responsibly Armed Citizen Criterion is Apache Solutions' 4-phase, belt-style progression system for civilian concealed carry—starting with safety & marksmanship and advancing to refined control & real-world competency. Every skill is pressure-tested with live-fire benchmarks, a written exam, and competency checks.

2. How long does it take to complete?

No set timeline—you advance when you're ready. We can say that the full RACC program typically takes 12–24 months, depending on your schedule and goals. It is not designed to be something that someone can just walk in and complete. The real benefit is in the process. So, come into this with a process focus, and the results will come.

3. Do I need prior experience?

No. You don't even need any gear! Sometimes, we prefer it that way. RACC starts at zero. Whether you've never held a gun or you're a seasoned carrier, your trainer meets you exactly where you are.

4. What do I need for the first session? A valid ID, a legal guardian must be present (if under 18), and a positive attitude!

5. How much does it cost?

Private sessions are \$60/hour or \$100/2-hours for the first 10 sessions. Rate drops to \$50/\$90 after your first 10 sessions. Pay per session—or take advantage of our end-of-the-year deals for a significant discount.

6. Can I use my own gun and holster?

Yes—bring what you carry. We'll assess fit, safety, and function. If you don't have gear yet, **please do not rush out and buy things**; we'll guide you through the process.

7. Is this just for concealed carry permits?

No. This is not a "concealed carry permit" class. RACC goes beyond permit classes. It builds lifelong proficiency, not just a certificate. (Permit training can be added if needed.)

8. What if I miss a week or two?

No problem! Sessions are 100% flexible—book when it works for you. Progress is tracked per phase, not calendar. We do ask students to retest on the previous phase if they have been absent for longer than 90 days.

9. Will I shoot on day one?

Only if you're ready. Phase 1 begins with safety, handling, and dry practice—live fire training comes after both you and your trainer feel that you are ready.

10. How do I know I'm improving?

Every phase ends with objective benchmarks:

- ✓ Apache B-8 scores
- ✓ Timed drills
- ✓ Skill demos (reloads, malfunctions, one-hand shooting)

You'll see data-driven proof of progress.

Ready to Start?
